

From tier 3 to 7, which of the BMD's are worth owning?

Hi,

I have not played any of these tanks since 2.0 came out and I reset my account, so I'm wondering which of these are worth owning. I'll be using global rep to unlock them, but based on recommendations, I'll buy some of the tier 3-7's and grind them in an effort to save some of that global rep. I will definitely be keeping the tier 8-10's, though.
